

Recognition of Mind in Global Systems --- A Higher Study

Author

Dr. Rojukurthi Sudhakar Rao

Returning Scholar to Self-Directed Research in Graph Theory & Applied, India

ABSTRACT

Let us recall for a moment, "Change is the Law of Life"!

Credit goes to one of the late Presidents of India, His Excellency, Dr. S. Radhakrishnan for having said that This is globally applicable to all forms of Life including that of old and new Nations aiming for peace & friendship with one and all. All peoples of all Nations in the World of today are fascinated by the global awareness of mutual peace & friendship in such a manner that they are fond of global systems seeking new global orientation to their present mindset without which Modernisation, Expansion and Diversification for Economic Growth are nearly constrained by the steady and persistent rise in the strength of respective populations. Upliftment of each one of the differently abled Nations to higher conditions of Power of Growth could be achieved with Global Systems truly in mind and such a mind unexaggeratedly is a global mind. Hence Mind in Global Systems drawing the advantage of Economic Growth with a global presence for people and populations globally.

The Author scanned several resources he could lay his hands on in the beginning of this April Summer, 2015 AD. to ferret out legal, scientific and social formulations of minds all over the Globe that led to achievements called global systems and duly recognized so. In the process, the Research surprisingly found out that scientific and legal formulations superseded other kinds of social formulations making prominent global systems. Consequently, this Higher Study born out of its preoccupation with Recognition of Mind in Global Systems.

Key Words: *Change, Global System, Mind, Growth, Nations, Credit, President . Scientific.*

INTRODUCTION

With a Title –frame embedding the inquisitiveness as a pointer to a higher study, this Paper is the Proposal /Project /Thesis/Higher Study with the likability to the most modern All-In-One (AIO) thin technology Personal Computer(PC) in an expansive range of Psychology of AIO booster for a researcher's psychiatric visualization (i.e., lacking restraint in the expression of inclination to overvalue one's work rather than undervalue) of the Global Systems with a quicker researching mindset to bring out an open-slim-study .

A Heuristic Analysis

Meaning of Global System:-- A policy of placing the interests of the World above those of individual and groups of Nations which rise above their

unilateral, bilateral and multi-lateral agreements, intelligence and profits .

Who can be Enemies to Global Systems?

Global Peace is the ideal while the United Nations Organisation is in its place. Who are the enemies to Global System?

Global Economics is the ideal while the International Monetary Fund is in its place. Who are the enemies to Global System?

Global Education is the ideal while the University of United Nations is in its place. Who are the enemies to Global System?

Global Health is the ideal while the World Health Organisation is in its place. Who are the enemies to Global System?

Global Justice is the ideal while the International Court of Justice is in its place. Who are the enemies to Global System?

Global Law & Order is the ideal while Interpol is in its place. Who are the enemies to Global System?

Expanding populations worldwide recognized the need for common security, food, drinking water and health services paving the way for Global Systems with a mind for creative economic and scientific values and global technologies. In fact, creative economic democracies halted hegemonies and imperialisms from growing while at the same time stabilizing themselves as global system and world's largest. The truth of economical equilibrium and global balance have indeed arrived much sooner than later for the stage set for the Economic World by the global systems. It would not be out of place here to recall that Political Science is the mother of all educative democracies which in turn either decimated or demolished the monopolies that were once upon a time the Crowns in the West and the East. A better perception of the essence of Political Science might also be considered as an important heuristic reference in order to be able to analyse more adequately the trends of global systems in the today's World.

Therefore, this higher study is going to be not enough in that it links the topics and problems of research which get extended selectively such as those of my choice just below .

Scientific Formulations of Mind of Global Systems: A Case Study

We all know the all-time greatest and bests, Newton and Einstein, of England and Germany, respectively, for their global systems exposition with explorative advancements in Physical Science with their highest intellectual emphasis dumped on the then Physical World of elemental Sunlight as opposed to the Darkness in the absence of Sunlight and the elemental Force as opposed to the Energy in the absence of Force.

Both Newton and Einstein, famous for their minds-- the Newton Mind & the Einstein Mind were the proponents of Global Systems on the Light and Energy having enunciated to their credit the respective eternal scientific physical formulae and have globalised their scientific formulations unchallenged that showed the World how the Sunlight travels and how the Energy takes the velocity of the Sunlight. The readers are already aware that the Planet Earth is lit by the Planet Sun in our daily life with Sunlight! That's how the Science got globalized as a global system and the scientific clue forms the mental aspect of Newton and Einstein in being common to both their minds.

>Newton ~~~~~

>Einstein

When Science is thus globalized with formulations, the global systems prevail unquestionably and hence irrevocable in the minds of world population growing knowing well that a global system has a base in a human mind and has the merit to ensure a globalised presence.

Legal Formulations of Mind of Global Systems: Illustrations

Recognition of Mind-in-Law by Lord Denning: EXAMPLE ONE

>>>> Lord Denning

>>>> Lord Diplock

The world famous Judgement in the Bolton (Engineering) Company Case and on record that:

A Company in many ways be linked to human body. It has a brain and nerve centre which controls what it does. It also has hands which hold the tools and acts in accordance with directions from the centre. Some of the people in the Company are mere servants and agents who are nothing more than hands to do the work and cannot be said to represent the directing mind. Others are Directors and Managers who represent the directing mind and controls what it does . The state of mind of these Managers is the State mind of the Company and is treated as such.

Recognition of Mind-in-Law by Lord Denning : EXAMPLE TWO

The World famous Judgement in the Texo Super Market Case and on record that:

The Court of Lord Denning laid down that a Company has no mind. It acts through living persons. The person who is acting is acting as the Company and his mind is the mind of the Company.

Recognition of Mind- in-Law by Lord Diplock: EXAMPLE THREE

The World famous Judgement in the Lennard's Case and on record that:

Those natural persons entrusted with the exercise of powers of the Company are to be taken as the Company and they are not mere servants of the Company but something more as their mind is the directing mind of the Company.

Conclusively, the above research products on the original Social, Scientific and Legal formulations of Mind of Global Systems vide the heuristic analysis, case study and illustrations accorded the due record and recognition values to the Mind in Global Systems and hence, profusely a higher study in this Paper. At the same time, it is not uncommon and difficult like a Himalayan task for a self-directed venture of choice to land up with a dynamic or the other kind of flabbergasting “research-byproduct” delving through the critical subject-matter at hand with the venerable historical association with the innumerable bibliographies. The new byproduct got duly recognized by me within the permissible scope and attention of mind of the global systems and so escorted hereunder afresh for further reading as “**Global Systems Won World**” to be known as the byproduct of **Mind of Global Systems** . Read further.

Global Systems Won World:---

A New Order

It is better to learn and digest from the information explosion going on around all of us that the Nature and Wealth of Nations constituted on this Globe are global properties to be administered vide a Global Constitution after a Global Referendum conducted prima facie.

In the present setup of sundry economic and political frameworks, private ownership rights and freedoms are stalling to not to easily allow emergence of a Global System with deep roots and fundamentals in a Global Constitution which operates Global System. It is not an exaggeration to say that the global thought processes , global

individuals and global minds construct a new Order to lead the global system destroying the sundry laws and aims of the economic and political frameworks in favour of global interests against random mindsets not globally commensurate.

A Logical Technique:

Many centuries ago, the Science of Reasoning was developed by the Greeks. It contains methods of techniques of reason-based statements called logical statements. The multi-pattern of logical statements evolved throughout have given initial polishing to logic to produce in its present form as we know it now in the 21st Century, the intellect. The totality of constructive logic is a highly sophisticated discipline helping the logicians with positive mind-set management in order to create, formulate, define, process and prove what a global system is. Devoid of logic, we cannot begin to end anything proving or disproving, the rational or irrational.

Global system is the complete and timely action for unification with international businesses and this trend made the current multinationals already global adhering to global business standards. Business in the global world will mean that the achievement scales will not be different from the pre-fixed global scales. The lessons of Business will be the yardstick to evaluating the performance of global businesses on the global scale, otherwise called 'Plimsoll Mark'.

A Science of Einstein:

Albert Einstein, the German-born American Physicist (1879-1955) and proponent of the Fourth Dimension – Time, said while formulating Energy that Nationalism is the measles of the human race popularly thereby putting forth that nationalism is out of tune with global systems and the world has been a maximum global system. As per Einstein, all the natural processes are functions of time with speed being always

relative. Same is the case with global system upbringing. Business nationalism is the beginning and end of business-isolationism worldwide. Global System enables manifold opportunities to do away with losses, imitation, litigation and double standards inherent in nationalistic business opportunism shrouded in ownerships and partnerships within nations.

A Global Business System:

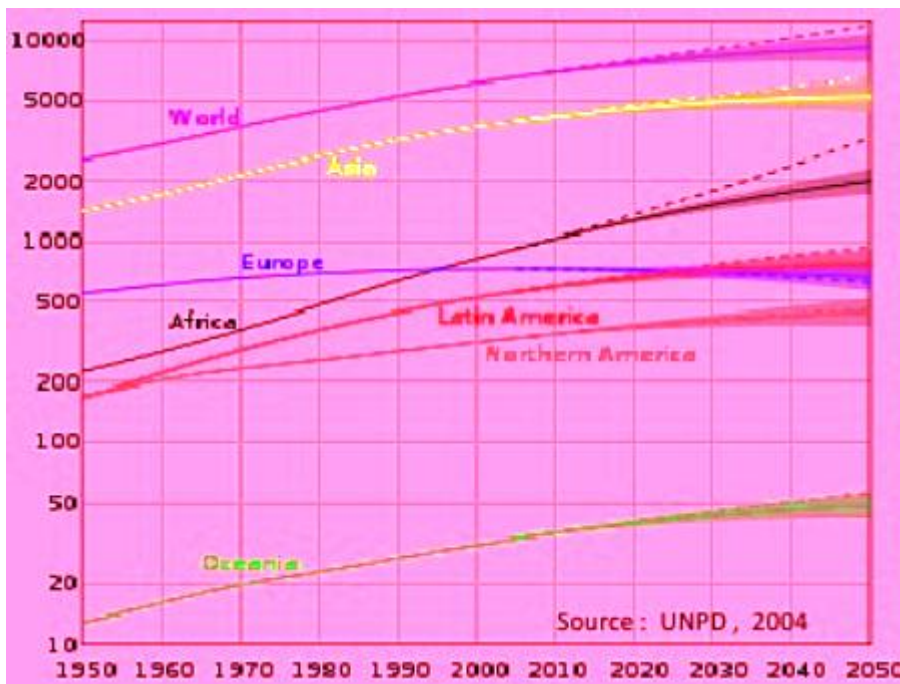

Global business-sense should be projected over political maps to elevate global system. Cross-border mergers represent the wave of global system without barriers to capital flight. Frog-in-well-ism has no space in Economics of global system. Optimistically, global business integration and global investors maximize the gateway of global system connecting knowledge of global minds.

Universally Known Systemic Risks of Population & Land Acquisition & Industry:

- 1. The Malthusian Theory of Population (MTP)**
- 2. The Man-Land Ratio (MLR)**
- 3. The Fourier's False Industry (FFI)**

1, 2 & 3 above did serve as broader vision triggering global system in the offing at one time or the other for over 300 years now. Let's know them in a nut shell.

Firstly, the **MTP** known famously for its Malthusianism stated that the global population increases faster than the means of subsistence and human beings are destined to poverty unless population decreases. This was described as the Malthusian Nightmare of Overpopulation and translated as a mathematical model of geometric progression for increase of population and arithmetic progression for the means of subsistence. It laid emphasis on preventive checks for achieving population decrease by means of moral restraint, late marriages and permanent life-long un-married-ness.

>>World Population Graph.

the population of the world and its regions (in millions) in which SOLID LINE indicates Medium Variant ; SHADED REGION indicates Low to High Variant ; DASHED LINE indicates 'Constant Fertility Variant.

Years
Fig. 1 : Past and Projected human population on different continents.

Table 1. Food grain requirement of different regions of the world in 2025.

	Population (billions)	Average per capita consumption (kg)	Food grains requirement (Mt)
Africa	1.62	257	416
South America	0.78	296	231
Asia	4.54	300	1362
North America	0.35	885	310
Europe	0.52	700	364
USSR	0.37	983	364
Oceania	0.04	578	23
World	8.22	373	3070

It also forecasted positive checks in the beyond-control events of natural earth quakes, psunamies, famines, plagues and human beings at Wars & Bloody Revolutions. However, the MTP has been denied and opposed by the Optimist School of Economic Thought (O' set) headed by an American Economist, Henry C.C with a French Economist, Claude F.B. saying that proof was lacking of any tendency of population to press upon food supply .

Secondly, the **MLR** categorically propounds that the total number of people or population in summation , the natural resources, the standard of level of living and the status of technological development at a given point of time & place, together makeup to a relationship called the man-land ratio (MLR). The population and the standard of living increase, either or both, as long as the natural resources are sufficient and technological progress continues.

Period	Population	Time Span
10,000 BC.	5 million	-
1650 AD.	500 million	1500 yrs.
1850 AD.	1000 million	200 yrs.
1930 AD.	2000 million	80 yrs.
1975 AD.	4000 million	45 yrs.
2012 AD.	8000 million	37 yrs.

Fig 2. Malthus, the Economist & British Demographer above with his Malthusian Nightmares

Table 2. Additional land requirement to meet cereal demand in 2025
(Source: WECD, 1987).

Region	Potential Arable (Mha)	Cultivated Land 1986 (Mha)	Cultivated for Cereals 1986 (Mha)	To be Cultivated for Cereals 2025 (Mha)	Additional for Cereals (Mha)
Africa	734	158	74	277	203
Asia	627	519	307	340	33
Australia and New Zealand	153	32	16	16	-
Europe	174	154	71	78	7
North America	465	239	103	103	-
South America	681	77	39	93	54
USSR	356	227	111	146	35
World	3190	1406	721	1053	332

(WECD -- World Commission on Environment & Development)

Should the natural resources become depleted and the progress in technological development ceases, increased population will cause a decrease in the level of living.

Thirdly, the **FFI** emphasized the deficiencies of the existing industrial system along with its

organization of labor and commerce being false saying that the basic unit of ideal system of social organization was to consist of a few hundreds of people in the range of 1700-1800 for total happiness for every one of them .

Table 3. Required changes in productivity of cereals and corresponding land requirements to maintain adequate supplies in different regions. (Source: WECD, 1987)

Region	Year			
	1986		2025	
	Land area (Mha)	Productivity (kg ha ⁻¹)	Land area (Mha)	Productivity (kg ha ⁻¹)
Africa	73.5	1175	277	1500
Asia	307.0	2534	340	4000
Europe	70.5	4137	77.4	4700
South America	39.0	1991	92.4	2500
USSR	111.0	1796	277.5	2500
World	721.0	2587	1053	2915

(WECD -- World Commission on Environment & Development)

The French social Philosopher, Charles Fourier, questioned the false industrial system for which

act it was named after him as the Fourier False Industry.

He criticized that the Laws of the State of Civilization in contemporary Society condemned and put to suffocation the free play of psychological traits, attractive work, labour of stimulated passion, short duration at same job, variable jobs to satisfy butterfly instincts, love within work teams, competitive passions among neighboring work groups, salutary feelings, no hostilities such as class and ego conflicts and expressions of God-given nature with natural inborn emotions without giving any value to them. The consequence of these passions being suppressed, according to Fourier, was that they were transformed into counter-passions creating universal unhappiness. He described the state of affairs as a term of opprobrium. He also formed

his own community organization by the name Phalanstery against the opprobrium and infused Fourierist inspiration. The New World of Industry and Partnership, a Treatise on Domestic Agricultural Association and The False Industry were his publications while his followers are known as the Fourierists.

Finale to Global System Won World:

The rapid strides of industrialization and agricultural productivity through an ongoing process of understanding the worldwide sweeping requirements eliminating where necessary the factors of redundancy is a testimony to Global System Won World. The course-pack contains technologies, people /human resources skill

development, services, capital and goods movements always and on fast track. This is not one's mere stretch of imagination but put at work of trade, commerce and industry potential which in fact is not pace-constrained but space-inspired. In other words, it is a central tendency among the present-day conflicting economic rides and high manifesto of services guaranteeing platform of factual 'Global System Won World' given every nook and corner of the global world .
